Utrecht University- master LLM European Criminal Justice in a Global Context - 2021/2022

Dear Colleague,

Last academic year we did start at Utrecht Law School a new master LLM European Criminal Justice in a Global Context.

The master focuses on the role of criminal justice systems in a Europeanized and internationalized legal environment, both from the perspective of enforcement and applicable human rights and constitutional standards.

Also thanks to you we have been successful in attracting and enrolling a first international group of more than 20 students and even in covid-times the group has a broad European profile.

We are now preparing for the next academic year and for sure we will be able again to work a lot on campus with the students.

Please find in attachment the folder/brochure with the program. Could you please be so kind to send it to students, researchers or practitioners that might be interested in it?

At this website they can also consult further relevant information:
