

SEMINAR –

Barriers and facilitators of data sharing

Wed, 24 November 2021

15:00 – 16:30 GMT

<<[REGISTER HERE](#)>>

This seminar will bring together world-leading experts in data privacy, population geography and **criminology** to discuss the main barriers and facilitators for geographic data sharing, including issues around data confidentiality and the need for Statistical Disclosure Control assessments, the selection of adequate levels of geographic aggregation, and practicalities around access to data and data management. This seminar is part of the Geoprivacy initiative, a collaborative project between the University of Manchester, KTH Royal Institute of Technology in Stockholm and Stockholm University.

The speakers:

- *Prof. Mark Elliot* (University of Manchester, UK) - Mark's research is focused on data privacy and statistical disclosure control. He founded the Confidentiality and Privacy Research Group (CAPRI) in 2002 and leads the UK Anonymisation Network.
- *Prof. Bo Malmberg* (Stockholm University, Sweden) - Bo's research interests include population geography with a focus on residential segregation and neighbourhood effects. He will discuss how to aggregate register data without losing geographical detail.
- *Prof. Marcelo Aebi* (University of Lausanne, Switzerland) - Marcelo's research is focused on international comparisons of crime. He is head of the Council of Europe's Annual Penal Statistics and Executive Secretary of the European Society of Criminology.
- *Dr. Oli Hutt* (Crest Advisory, UK) - Oli is the Strategy and Insight Manager at Crest Advisory. He has extensive research using police recorded crime data to measure spatial and temporal trends in crime at the level of micro places. Oli managed a secure data research facility at University College London - the first of its kind in Europe.

The seminar will be chaired by Dr. Eon Kim from the University of Manchester, UK.
