Session 1

Busting crime prevention myths

(Full)
Participants will explore misconceptions, reflect on why it is often so hard to translate evidence into evidence-based policy practice, and what can be done to change that.

The administrative approach in the field

The administrative approach sometimes leads to confusion as to what it actually consists of, therefore, several practices will outline how this approach can tackle serious and organised crime.

Effective anti-bullying interventions

The session will focus on evidence-based prevention strategies against bullying that can be applied on every level of a minor's life: individual level, family level, school level and community level.

Session 2

How to manage a crime prevention project?

(Full)

Participants will be guided through the various steps of a prevention project, from start to its evaluation, with real-life examples.

Community-oriented policing

The session focuses on COP in different EU Member States by visiting common key principles which are important for a successful implementation.

Urban youth violence

Several practices will zoom in on the prevention of urban youth violence, a topic closely aligned with the upcoming EUCPN Toolbox on the prevention of street gang recruitment.

Session 3

Prevention by building bridges

Several practices will be presented that focus on cooperation on different fronts in Greece, Sweden, Estonia and Ireland.

What works to prevent domestic burglaries?

Which initiatives may or may not work to prevent domestic burglaries? How can behavioural insights and nudging be used? ...

Targeted approaches domestic violence

This session will highlight two aspects: the need for targeted and tailored approaches & perpetrator programmes.
